

Datasheet

ELECTRO-MAGNETIC LOCKS/ DPM Series - Door Position Monitor for Surface Magnetic Locks

Product description

The DPM Series provides a cost effective method for door position monitoring. Added to a monitored electromagnetic lock, the DPM ensures a more infallible system.

It is ideal for auto-relock control and saves fitting door contacts.

The DPM Series comes in three versions for 300kg (DPM300), 400kg (DPM400) and 500kg (DPM500) V series surface magnets.

Key features

- Monitors the door position
- Retrofits to surface magnets
- Saves fitting door contacts
- Changeover contact
- Option for 300kg (DPM300), 400kg (DPM400) and 500kg (DPM500) magnets

 *Certification*

 *DEEE*

RoHS *Certification*

Product Information

Changeover contact: fitted to magnet cover plate

Armature extension: houses the contact magnet

Relays

Output: NO & NC

Contact rating: 100mA
