## ACCESSORIES/ RTE-PTO Series - Large All Active Switch

### Product description

Our range of “All Active” exit switches have a brushed stainless steel faceplate and are supplied as flush or surface. These switches fit on a standard UK back box.

“All Active” means the complete surface area of the face will activate the switch. This is ideal for those who have difficulty targetting a smaller button and is particularly suited for DDA compliance and general high traffic areas such as hospitals, public buildings and colleges.

All models include a heavy-duty micro switch with a common, normally open & normally closed changeover contact.

### Key features

- High quality stainless steel switch
- Large all-active target area
- UK back-box format
- Surface or flush
- Suitable for DDA environments
