## PROXIMIY READERS/ SELW-R433 - Radio receiver

### Product description

This Wiegand receiver 26 bit allows use of radio transmitters for connection to online access control systems.

The SELW-R433 is compatible with all CDVI TX26 series transmitters.

The SEA433 can be used as an optional tuned antenna with this receiver for better reception.

### Key features

- Optional tuned antenna
- Up to 100m range in open field
- Single Channel wiegand output
- Surface mounting
- Compatible with all CDVI rolling code transmitters

 *Certification*

 *DEEE*

 *Certification*

 *IP2X*

 *-20°C to 70°C*

## Product Information

**Material:** polycarbonate housing

**Wiegand:** 26 bits

**Frequency:** 433 MHz

**Encoding:** Keeloq rolling code

## Electrical Specifications

**Operating voltage:** 12/24Vac/dc

**Max current:** 24mA
