

Ref. 9620 MDS CITY CLASSIC DIGITAL KEYPAD MODULE

DESCRIPTION

Keypad module of spare parts for inclusion in City Classic door entry panels and MDS Digital System.

The digital keypad module lets you make house calls by entering the corresponding code assigned to the home.

With built-in access control functions by keypad codes (pre-programmed), activating the door release when a given code is keyed in.

City Classic is the "continuous profile" outdoor panel line for buildings.

The PANELS are manufactured in anodized aluminum, highly resistant to rough weather and climate changes.

The panel design stands out for its curved-convex profile. A cellular rubber airtight seal included assures a perfect panel-to-wall fit to prevent water filtrations.

Available in several colours: aluminum, golden or bronze and white.
